

# East Midlands Railway

## Class 222

### Reskin Pack

## Requirements:

### JustTrains Class 222 Advanced

## Installation:

- Copy the "Assets" folder into your Railworks folder (This can be found by going to your Steam Library, right clicking on Train Simulator then Manage - Browse local files)
- Run the "InstallEMR222.bat" now located in Railworks/Assets. (Do not run as Administrator)

(When running the bat file, if you have a previous version installed, it will delete some older files from previous versions that would conflict with the files included now, so if you don't have a previous version but it looks like there's an error, don't worry!)

## Old\_170 included file:

This reskin pack is now intended just for the Class 222, but I have still included the EMR Class 170 that was a part of the previous version of this reskin pack, however it has not received any updates. This is because I just have no intentions of updating it, but I thought to include it in case there are any already existing scenarios that require it.

# East Midlands Railway 2

## Included extras

- Automatic numbering (Set from DMSO coach number)
- 3 different front yellow sections shown dependent on unit number

I think that is all, I hope you enjoy using these reskins and the effort that has gone into making them!
